

The supplier KIFATO MK, Klin from Russia delivers system shelves and product carriers to the OBI system.

The cooperation started in March 2008 with the adoption of their system units to the OBI requirements.

Kifato turned out to be very flexible in realizing the requested adoptions and was the winner of the following tendering of the relevant units.

As a conclusion they delivered system shelves for 4 Russian and Ukrainian OBI stores with an approximate area of 40.000 sqm, fulfilling the expectations in respect of quantity, quality and delivery dates by a large extent.

Since the beginning of the cooperation they have constantly extended their production capacity, which enabled us to give them orders for additional countries in 2009. We are planning to buy also other products from Kifato MK after their expansion is completed. For example they will deliver cantilever shelves to our OBI stores in future.

With the placement of the first order the OBI group has listed KIFATO MK in the international supplier database.

Mit freundlichen Grüßen / Best regards
